

Science Competition

Your science topic this term is **Caring for Animals and Our Environment**. Your challenge is to show what you know about this topic in any way you choose.

You might want to try one of these ideas:

- Reuse boxes and packaging to make an animal model
- Draw or paint a picture of an endangered animal
- Create an endangered animal collage

All entries will be displayed at our **School Science Fair** on Tuesday 14th March and the winners will be given a special prize.

You must give your entry to your teacher by **Monday 13th March.**

We can't wait to see your amazing work!
